TRAILER Cloroformio Deuterated chloroform is an isotopologue of chloroform with a single deuterium atom. CDCl<sub>3</sub> is a common solvent used in NMR spectroscopy.Deuteriochloroform is produced by the haloform reaction, [citation needed] the reaction of acetone (or ethanol) with sodium hypochlorite or calcium hypochlorite. The haloform process is now obsolete for the production of ordinary chloroform.

CHLOROFORM | definition in the Cambridge English Dictionary

Chloroform (CHCl<sub>3</sub>) is a colorless liquid that quickly evaporates into gas. It can harm the eyes, skin, liver, kidneys, and nervous system. Chloroform can be toxic if inhaled or swallowed. Exposure to chloroform may also cause cancer. Workers may be harmed from exposure to chloroform. The level of exposure depends upon the dose, duration, and work being done.
