Re: 91 Mercury 135 hp Blackmax The thermostat for that engine is probably in line with most Mercs of the vintage and that is an opening temp (pellet stamped temp) of 143F. Once the stat opens, engine block temp will rise and 10-15 degrees over that is reasonable. Stat is only operational for lower speeds. As rpm's increase to 1500 to 2500 range ...

Mercury Marine V-135 HP Outboard Motor Parts by Serial ...
Mercury came out with it's V6 engines around 1976 and dubbed them the "Black Max" engines. They came non-oil injected and in 150, 175, 200 and 225 hp versions and in two displacements, 2.0 Liter for the 150 (steel sleeved) and 2.4 Liter (chrome bore) for the others. These were crank rated for hp and when the industry changed to prop shaft ratings the 150 went to 135hp and 175 to 150hp etc.

Mercury 135 hp 2 liter 1986-1991. These outboards impress us every time we remanufacture them. They have one of the thickest cylinder walls ever manufactured. These thicker walls prevent the cylinders from going out of round as readily as other outboards. Mercury created the 76 degree v6 design in 1976 the other outboard manufactures did not catch up until the 90's. We found that the few ...
