Economics

Urban economics is broadly the economic study of urban areas; as such, it involves using the tools of economics to analyze urban issues such as crime, education, public transit, housing, and local government finance. More specifically, it is a branch of microeconomics that studies urban spatial structure and the location of households and firms.

Much urban economic analysis

relies on a particular model of urban spatial structure, the monocentric city model pioneered in the 1960s by William Alonso

Urban economics - Wikipedia
The sixth edition of "Urban Land Economics" examines economics as applied to property. It clearly shows how economic analysis can be applied to economic problems associated with land and explores ways in which the allocation of land resources can be improved. It is a useful course companion for courses in land and property economics.
